

Assignment for visiting senior TAs:

Arrange to visit another TA's discussion section. I'll compile a list of some who have agreed to have visits and who have been recommended to visit and share it via email. You may choose someone else, but for this assignment it must be someone who is in at least their second year of being a TA at UIC. Look up schedules, rooms, email addresses, etc. by using the course websites and the links in the list at: <http://www.math.uic.edu/people/TAs>

During the visit, watch for ways that students are engaged in active learning. List five actions of the TA that helped promote student engagement. Also list five ways that this TA could improve (constructive criticism only.) You do not need to share these lists with the person you are watching.

By September 23, turn in the two lists of five items each. Also choose at least one item from one of these lists that you could use to improve your own teaching. Explain in a few sentences how you plan to implement this improvement in your own teaching.
