

Final Exam

§1.1-1.4, all Ch. 2, all Ch. 3, all Ch. 4, §5.1-5.6, §6.1-6.4

You are allowed to use:

- Pencil(s)
- Calculator (though some problems may specify that steps must be shown by hand)
- One 3"x5" Notecard, with hand-written notes on the front and back.

Material emphasis will be §5.3-§6.4. This is for 2 reasons:

- This material has not been tested yet.
- Testing on this material tests material from the entire course.

Study suggestions:

- Brush up on concepts and procedures that appeared on exams 1 and 2.
- At least skim the text from §5.3-§6.4. Make special note of definitions and theorems.
- Be sure you have worked all the assigned homework problems from these recent sections. Pay particular attention (though not exclusive attention) to problems that were graded. Make use of the keys provided by section experts, available on the syllabus website.
- Browse the lectures from these recent sections to note topics that were emphasized.
- Re-work the quizzes from Chapter 5 and Chapter 6.
- Work the sample exams found on the main UIC Math 310 page.
- Attend the review session on Monday from 1:00 to 5:00 across the hall (in 311 AH) to work on sample exams.

Don't forget the room!

The Final Exam is Tuesday from 1:00-3:00pm in **304 BH**.
