2. OPEN ENDED QUESTIONS (TA)

2.1) Please comment on specific characteristics of the teaching assistant that were most beneficial to you:

- He basically wants everybody to understand calculus
- I found Mr. Carpenter's teaching very clear and thorough. His lessons were easy to follow and he answered any question understandably.
- I think Ryan presented the class material to us in a way that made everyone truly understand it. Also, he always made sure we all could do the practice problems and helped when needed. Probably one of the best, if not the best TA I have even had here at UIC.
- I went to his office hours a lot and he's a really kind person, and is super patient while explaining stuff.
- In the lecture classes, it's kind of difficult to ask personal doubts, but during the discussion classes, Ryan always help with questions that I struggle.
- My TA always answered questions and provided very useful warm-up problems.
- My TA has been an invaluable resource in my math class. Thanks to their exceptional ability to explain complex problems, I have a much better grasp of the course material. And he also watches anime which is great.
- The most beneficial part of his teaching was making the class an interactive class where students were able to participate and support each other. I also like how there were warm-up problems since it allowed me to see if I understood the concept and topic of that week's

discussion.

- Very understanding, helps understand problems easier.

2.2) Please comment on the specific characteristics of the teaching assistant that need improvement:
