

Math 180 – Calculus I

Discussion syllabus

Fall 2014

TA: Sam Cole

Email: scole3@math.uic.edu

Office: SEO 522

Course webpage: math.uic.edu/coursepages/math180. Almost anything you could possibly need to know about course logistics is posted here. In addition:

- **Discussion format:** the point of discussion is to give you more practice solving problems. Typically, I will give you a handfull of problems to work on during class and help you as needed. Also, please bring any questions you might have! I am not allowed to solve your homework problems for you, but I'm happy to give hints or go over them after you turn them in.
- **Attendance of both lecture and discussion is mandatory!** You must attend $\geq 80\%$ of all classes (lecture and discussion) in order to pass. I will take attendance at the beginning of class; your lecture attendance will be determined by quizzes.
- **Homework** will be collected at the beginning of discussion on days when it is due.
- **Office hours:** TBD, in Math Learning Center (SEO 430). Feel free to approach any other TA in the Math Learning Center if I am not there. Also, feel free to stop by my office (SEO 522) at any time, although I cannot promise that I will be there. Finally, you are welcome to make an appointment with me or ask questions via email.
- I will occasionally post stuff (such as this document) to my webpage, math.uic.edu/~scole3/fall2014/math180.
